

Pathology Department

Pathology is a unique medical specialty, being the basis of practice of scientific medicine as diagnosis is the foundation of all patient care. In fact, more than 70 percent of all decisions about diagnosis and treatment, hospital admission and discharge rest on laboratory test results.

The pathology department of RMI provides necessary diagnostic support to the hospital and many patients of other medical institutions in the vicinity or even for patients from far flung areas and our neighboring Afghanistan for routine and rear high tech test procedures.

The qualified and experienced faculty members in pathology department are supervising all the sub-specialities which include,

Chemistry & Endocrinology
Histopathology & Cytology
Serology

Hematology & Blood Banking
Microbiology
Molecular Biology

The pathology team is supported by well trained technicians who form the backbone of the department with acceptably high standards of management and guidance, utilizing the most modern laboratory equipment, state-of-the-art auto analyzers directly interfaced with the laboratory and hospital information management system.

Blood Bank, provides all the blood components as well as single donor platelet concentrates and is delivering high quality Plasmapheresis service.

Endocrinology, performs various dynamic and endocrine function tests including thyroid, male & female fertility hormones, SHBG & DHEA.

Immunology, performs anti-thyroid antibodies besides autoimmune profile including ANA, ANCA & Anti-dsDNA.

Molecular Biology, performs qualitative & quantitative PCR for Hepatitis B & C.

Arterial Blood Gasses are performed stat and results are delivered on the spot.
